Onboarding Wizard

Thank you for choosing us. Please fill in the questions below so we can set up your SEO workspace. **Only the three fields marked Required must be answered.** Anything you leave blank, we will work out ourselves from your website and Google data, using the default shown. Short answers are fine.

> Return the completed form to your account contact. Please do not include passwords. We will request access to Google tools separately, by invitation only.

1. Business identity

#	Question	Why we ask	Your answer	If left blank
1.1	**Business name** (Required)	So we know whose site we are working on.		—
1.2	**Website URL** (Required) e.g. https://acmedental.com	This is the site we will review and improve.		—
1.3	Owner / main point of contact	So we know who to talk to and who approves changes.		Unspecified
1.4	Contact email	Where we send reports and questions.		Unspecified
1.5	Business model: local, multi-location, national, e-commerce, SaaS, lead-gen, publisher, or other	Each type of business is found in a different way, so we choose the right checks.		All models checked
1.6	Other business name spellings or abbreviations customers use	People search for you in different ways. We want to catch them all.		Name and domain only

2. Targeting

#	Question	Why we ask	Your answer	If left blank
2.1	**Primary country** (Required)	Search results differ by country, so we look at the right one.		—
2.2	State / region	Lets us focus on the areas you care about.		Country-wide
2.3	City	Helps us see how you appear to people searching nearby.		Country-wide
2.4	Service area (cities or radius you serve)	So we aim at places you actually serve.		Entire country
2.5	Languages your customers use	So we research searches in the language your customers type.		Country's main language
2.6	Who is your ideal customer?	Helps us pick topics and wording that suit the people you want.		All audiences
2.7	5 to 20 search terms you want to be found for	These are our starting point for finding what people search.		We research them
2.8	3 to 5 competitor websites	Shows us who you are up against and what they do well.		We find them

3. Local details (local and multi-location businesses only)

#	Question	Why we ask	Your answer	If left blank
3.1	Business name exactly as listed publicly	Google likes your name, address and phone to match everywhere.		Business name
3.2	Full address	We check it matches across the web and on Google Maps.		We look it up
3.3	Phone number	Same reason: a matching number builds trust with Google.		We look it up
3.4	Google Business Profile link	This is your Google Maps listing. It drives local calls and visits.		We search for it
3.5	Opening hours	So hours shown online are correct and consistent.		Taken from Google profile
3.6	Other locations or branches	Each location needs its own presence in search.		Single location
3.7	Directories you are already listed in	We check your details are right and find gaps.		We look them up

4. Access and integrations

#	Question	Why we ask	Your answer	If left blank
4.1	Google Search Console: do you have a property? Which one?	Search Console is Google's free report on how your site shows up in search. It tells us which searches bring people to you and if Google has trouble reading your pages.		Client action later
4.2	Google Analytics 4 property ID (numbers only)	Analytics shows what visitors do on your site. It lets us see which pages bring in calls, forms or sales, so we focus on what earns you money.		Client action later
4.3	Bing Webmaster Tools: verified?	Same idea as Search Console, but for Bing, which also powers some AI search tools. It shows who links to you and how Bing sees your site.		Client action later
4.4	Google Merchant Center ID (online stores only)	This is where your products are listed on Google. We use it to check your products can appear in Google Shopping and product results.		Not applicable
4.5	Has the site changed domain, or had URLs moved, in the past? Give dates	Moving a site can cost search visibility. Knowing the history helps us explain past drops and avoid repeating mistakes.		None known

We will ask you to add our team email as a user in Search Console and Analytics. This is view-only access, and you can remove it at any time. Please do not send logins.

5. Goals and context

#	Question	Why we ask	Your answer	If left blank
5.1	What counts as a win: calls, forms, purchases, bookings?	So we measure success by what matters to you.		All conversions
5.2	Pages or sections that matter most	So we put effort where it pays off most.		Entire site
5.3	Topics or claims we must avoid	Keeps our content safe and on-brand.		None
5.4	Past SEO work, agencies, or penalties	Avoids repeating work or tripping over old problems.		None known
5.5	Brand voice (e.g. friendly, formal, expert)	So anything we write sounds like you.		Neutral, professional
5.6	Social media profile links	Helps Google connect your site with your official profiles.		Taken from your site

What we find ourselves

You do not need to supply these. We detect them from your website and public data, and will ask you to confirm anything we are unsure about.

Item	How we find it
Industry and value proposition	Homepage and its metadata
Top products and services	Site navigation
Website platform, SEO plugin, CDN	Homepage code and headers
Existing structured data (schema)	Homepage code
Google profile categories	Google Maps search
Search Console and Bing status	Our own access check
